

ERA Club Equipment

The Club has a range of equipment to help with our hobby. Some equipment is available for loan between meetings, some is only available for members to use at Club meetings.

There's a small charge when borrowing Club equipment.

This is usually £5.00 per session. A session is usually one Club meeting to the next, or shorter.

Contact a Committee member to arrange a loan.

Club Equipment available for loan (i.e. use offsite).

- 8" Meade SCT on a goto AltA zmount – Hubble.
- 8" Meade SCT on a motorised EQ mount – Kepler
- 8" Celestron SCT on a motorised EQ mount – The "orange" one.
- 10" Dobsonian mounted Newtonian telescope – "Big Purple".
- 6" Dobsonian mounted Newtonian telescope – the "small white" one.
- Coronado solar scope, with manual EQ mount if required.
- Prinz solar projection telescope (76 x 1250mm) with tripod.
- 6" Newtonian on an AltAz tracking mount – "Cherry Red"
- 112mm Newtonian on an EQ1 mount.
- Two smaller travel scopes

Club Equipment available for use during meetings(i.e. use onsite).

All of the above, plus 20" Dobsonian mounted Newtonian telescope – the TS20.
